

GREENS LIAISON REPORT – JANUARY 2022

Dear Members

I hope you all had a happy and healthy Christmas & New Year.

After a very wet start to the year, I hope you have noticed how much the greens have improved during 2021. This is due to the specialist equipment that was brought in to de-compact the soil under the greens plus the aerating and thatch removal.

The bunkers have had some attention this year and hopefully, in the near future, some of the bunkers are going to be made smaller.

At the moment the greens staff are installing stone cages in the pond at the second hole to improve the appearance of the hole and also seal the leak so the water level can be increased.

I regret the Head Greenkeeper cannot provide a maintenance plan for the year because he does not know what the weather is going to do around the times he wishes to perform works i.e. long periods of rain or drought/heat which would then directly affect the nature and duration of intended works.

Lastly new tee signs were installed.

I would like to thank Mr Brian Harrison for all his help during the last year in helping me paint the bridges, repair the roof at the halfway house and the shelter at 9 after the storm just before Christmas.

Please do not hesitate to contact me during the year with any queries with the course.

Yours

I MacDonald
Greens Liaison
